

Engineer position at Celltainer Biosolutions GmbH, Berlin

The company

The Celltainer Biosolutions GmbH is a daughter company of Celltainer Biotech BV in The Netherlands and involved in process and development support to the customers of Celltainer Biotech BV as well as providing development support to Celltainer Biotech BV itself. Celltainer Biotech BV develops, produces and sells single-use bioreactors on basis of their unique 2-D rocking based platform. These reactors are characterized by their high oxygen transfer capacity and mixing performance under low-shear conditions. Celltainer Biotech also provides the single-use bags, monitoring and control instrumentation integrated into their bioreactor systems.

Position

As an engineer at Celltainer Biosolutions, you will be responsible for the following tasks:

- Mechanical and electrical development of new products
- Testing and co-developing equipment
- Technical sales support (installations, service maintenance, Factory acceptance tests)
- Documentation tasks (writing manuals, protocols, reports)

Your profile

- Mechatronics background or comparable technical qualification (FH)
- Work experience in industry (preferably life science environment)
- Experience with programming/IT
- Hands-on skills
- Collaborative and communicative skills
- Creative and curious in your attitude
- Comfortable in working with customers
- Fluent in English and German
- Working permit for EU
- Independent and creative in daily work
- Highly motivated
- Flexible for business trips all over the world

Working Conditions

The working place will be based in Berlin. The applicant will be welcome to start on **April 1, 2021**.

For further information or sending the CV, please contact info@celltainer.com. Application deadline is March 19, 2021.

We are looking forward to working with you!
